supporters of neoliberalism claim that free markets lead to economic growth the creation of a middle class and the establishment of democratically accountable governments critics point to a widening gap between rich and poor as countries compete to win foreign investment and to the effects on the poor of neoliberal programs that restrict funding for health education and welfare this book offers a ground level view from sumatra of the realities behind these debates during the final years of suharto s new order and the beginning of a transition to more democratic government the author s wealth of primary data from ten years of interviews and local newspaper reportage 1994 2004 shows how farmers and laborers were

dispossessed by both government policies and crony capitalism elizabeth collins relates the stories of populist efforts in south sumatra to combat development policies responsible for producing extreme poverty and allowing corruption to flourish she describes how student led ngos worked with farmers fighting to retain their livelihoods in the lowland forests of south sumatra she reports on a local branch of the indonesian environmental forum as it battled multinational companies and indonesian conglomerates responsible for damage to the environment on contract workers protesting exploitation by a company with ties to a suharto crony and on systemic corruption under the new order which spread throughout all levels of government and into civil society organizations she examines the sometimes strained relationships between islamists and human rights activists arguing that there is no inherent contradiction between islam and democratic politics collins concludes that for real change to occur neoliberal capitalism must be recognized as a utopian ideology democracy imperfect as it is offers the best hope for sustainable development in indonesia

this book shows the growing phenomenon and the broad impact of socio environmental conflicts in the grassroots communities farmers fishermen and urban poor in indonesia as the effects of government s development strategies based on neoliberal and new public management nrm views without a clear accountability system or socio environmental accountability practices and reports are becoming apparent inspired by the emancipatory socio environmental accounting discourse which focuses on the socio local context in developing alternative models of accountability based on local views and people s aspirations this book uses research methodology based on the principles put forth by indonesian national hero and critical scholar tan malaka to develop a framework of integrated accountability for the local government this book fills the present gap in english publications that analyse the intents and outcomes of the public management reforms in indonesia with regard to socio environmental issues as a basis for further research at the international level as well as policymaking in indonesia as the indonesian government has recently undertaken key structural and accounting reforms in the public sector this book is a timely and valuable read for graduate students researchers and policymakers

the tpp was negotiated among 12 economically diverse countries including some most highly developed and rich countries i e the united states japan australia canada new zealand and singapore some newly industrialized countries i e mexico and malaysia and some less developed countries i e peru chile and vietnam a new paradigm created in this context is that countries with vastly different economic developments can actually agree on a set of very high standards to regulate their economic activities to liberalize their trade and to protect intellectual property and foreign investment the contents of the tpp also reflect its status of being a new paradigm as the 21st century trade agreement and being a pioneer in rule making in many key regulatory areas these include not only the improved and enhanced rules on traditional issues already covered by the wto such as goods services and ip rights but also the carefully designed rules in areas that have never been addressed in the wto or comprehensively covered in other ftas such as state owned enterprises electronic commerce and labor and environmental issues although the united states has withdrawn from the tpp the remaining countries are still putting efforts into establishing a tpp without the united states or a tpp with china economically speaking the current 11 parties account for about 20 of the global economy if such agreement is put into force there will be significant implications for the region for the multilateral system and even for other ftas the book addresses the potential of the tpp to change the ways trade and investments are conducted and argues for its potential to be the start of an international trade economic law revolution the book elaborates the relationship between the tpp and other existing trade agreements such as the wto and other ftas and explains how the tpp is to deal with traditional and new issues taken together the authors argue that the implications of the tpp go beyond its current membership it is hoped that the book will make an important contribution to the field of international economic law
